

Locating the SD Card Slot in Your Vehicle

The SD Card slot is typically found in the center of the instrument panel below the climate controls. ①

In some models, the SD Card slot may be inside the center console (arm-rest area). The SD Card slot may be located in the front ② or the rear ③ of the center console. With the lid open on the center console, look for the SD Card slot in either of these places.

With the vehicle powered off, you can eject the existing SD Card from the slot by giving a gentle push on the SD Card and then pulling it out. ④
